

Output Content (OC)

Score: 2/5 — Significant gaps | Confidence: medium

Benchmark: MILU | Context: Hindi-Medium Competitive Exam Aspirants — North India (Central Exams)

Definition: Whether ground-truth labels align with the judgments of regional stakeholders.

Justification

Output content priority is MODERATE. For MCQ correctness, MILU has a credible label-provenance chain: questions and answers come from online exam portals where subject experts ensure answer accuracy [Q26], with internal AI4Bharat manual audits [Q87]. However, several issues lower the score: (a) annotator demographics, IAA, and formal QA protocol are not reported — paper does not say whether auditors were Hindi-medium graduates or central-exam experts; (b) the deployment's PRIMARY output (Hindi-language explanatory rationale) has no ground-truth labels at all in MILU [CRITICAL Concern 1]; (c) dataset analysis surfaces at least one suspicious 'none of these' answer for a specific constitutional article query [DATASET-D49] suggesting some scraping data-quality issues; (d) for the ~5+ structurally truncated items observed [DATASET-D43-D48], the labeled answer cannot be validated without source content. Convergent validity for the rationale construct is undefined because the construct itself is not annotated.

ID	Evidence
D43	एथेनॉल के बारे में दिए गए चार कथनों पर वचार करें और दिए गए विकल्पों में से सही उत्तर चुनें: (1) और (3) केवल — Ethanol statements question — options reference numbered statements absent from the question
D44	भारत में सभी बहुआयामी गरीब व्यक्तियों में से आधे से अधिक नमिनलखिति राज्यों में रहते हैं: केवल A, B, D और E — Multidimensional poverty states — options reference A/B/C/D/E labels with no list in question
D45	नमिनलखिति में से कौन सी ऑक्सीकरण-अपचयन प्रतिक्रियाएँ हैं? (केवल a, d) / (केवल b, c) — Redox reactions question — options reference a/b/c/d labels absent from question text
D46	नमिनलखिति में से कौन सा एक शुद्ध पदार्थ है? (b), (c) और (d) — Pure substance — options reference items (a)/(b)/(c)/(d) absent from question
D47	वकिल्प चुनें जो वाक्यों B, C, D और E को एक तार्किक क्रम में व्यवस्थिति करता है। वाक्य A और F स्थिति हैं। AEDBCF — Sentence ordering — sentences B/C/D/E absent from question text
D48	नमिनलखिति पदार्थों को प्रयोगशाला में उनकी पहली संश्लेषण की कालानुक्रमिक क्रम में व्यवस्थिति करें: 4 2 3 1 — Chronological ordering of substances — substance list absent from question
D49	छत्तीसगढ़ में नगरपालिकाओं के सभी चुनावों के संचालन के लिए पर्यवेक्षण, दशिता और नयित्त्रण का प्रावधान कसि अनुच्छेद में है? इनमें से कोई नहीं — Article on municipality elections in Chhattisgarh — answer is 'none of these' suggesting data quality issue
CRITICAL Concern 1	Every example in the sample is structured as a 4-option MCQ with a single correct label ('target'). There are no rationale fields, explanation columns, or any annotation supporting the deployment's core output requirement: a substantive Hindi-language explanation of why an answer is correct or incorrect.

Strengths

- MCQ answer keys inherited from established exam-portal QA processes [Q26]
- Internal manual audits by AI4Bharat volunteers [Q87]
- Manual review of topic-tag clusters before assigning subject labels [Q41]

Checklist

Checklist item definitions:

ID	Assessment Question
OC-1	Do ground-truth labels reflect regional stakeholder perspectives?
OC-2	Assess potential annotator-regional population disagreement
OC-3	Review annotator demographics from documentation

OC-4	Consider label re-annotation by regional annotators
OC-5	Review aggregation methods for minority perspective erasure
OC-6	Document label issues harming convergent/external validity

Checklist responses:

OC-1: Ground truth MCQ labels reflect Indian exam-portal expert judgments [Q26], but no rationale labels exist for the deployment's primary output [CRITICAL Concern 1].

ID	Evidence
CRITICAL Concern 1	Every example in the sample is structured as a 4-option MCQ with a single correct label ('target'). There are no rationale fields, explanation columns, or any annotation supporting the deployment's core output requirement: a substantive Hindi-language explanation of why an answer is correct or incorrect.

OC-2: MCQ answer disagreement risk is low for canonical items; rationale-level disagreement cannot be assessed because no rationale annotations exist.

OC-3: INSUFFICIENT DOCUMENTATION — paper acknowledges AI4Bharat volunteer audits [Q87] but does not report demographics, Hindi-medium status, or domain expertise of annotators.

OC-4: Re-annotation needed for: (a) any items with 'none of these' answers [DATASET-D49]; (b) all structurally truncated items [DATASET-D43–D48]; (c) full rationale-quality annotation by Hindi-medium central-exam experts.

ID	Evidence
CRITICAL Concern 1	Every example in the sample is structured as a 4-option MCQ with a single correct label ('target'). There are no rationale fields, explanation columns, or any annotation supporting the deployment's core output requirement: a substantive Hindi-language explanation of why an answer is correct or incorrect.
D43	एथेनॉल के बारे में दिए गए चार कथनों पर विचार करें और दिए गए विकल्पों में से सही उत्तर चुनें: (1) और (3) केवल — Ethanol statements question — options reference numbered statements absent from the question
D44	भारत में सभी बहुआयामी गरीब व्यक्तियों में से आधे से अधिक निम्नलिखित राज्यों में रहते हैं: केवल A, B, D और E — Multidimensional poverty states — options reference A/B/C/D/E labels with no list in question
D45	निम्नलिखित में से कौन सी ऑक्सीकरण-अपचयन प्रतिक्रियाएँ हैं? (केवल a, d) / (केवल b, c) — Redox reactions question — options reference a/b/c/d labels absent from question text
D46	निम्नलिखित में से कौन सा एक शुद्ध पदार्थ है? (b), (c) और (d) — Pure substance — options reference items (a)/(b)/(c)/(d) absent from question
D47	विकल्प चुनें जो वाक्यों B, C, D और E को एक तार्किक क्रम में व्यवस्थित करता है। वाक्य A और F स्थिर हैं। AEDBCF — Sentence ordering — sentences B/C/D/E absent from question text
D48	निम्नलिखित पदार्थों को प्रयोगशाला में उनकी पहली संश्लेषण की कालानुक्रमिक क्रम में व्यवस्थित करें: 4 2 3 1 — Chronological ordering of substances — substance list absent from question
D49	छत्तीसगढ़ में नगरपालिकाओं के सभी चुनावों के संचालन के लिए पर्यवेक्षण, दशिया और नयित्तरण का प्रावधान किस अनुच्छेद में है? इनमें से कोई नहीं — Article on municipality elections in Chhattisgarh — answer is 'none of these' suggesting data quality issue

OC-5: INSUFFICIENT DOCUMENTATION — paper does not describe aggregation methods or how disagreements between portal answers and audits were resolved.

OC-6: Documented harms: rationale-quality construct entirely unannotated [CRITICAL Concern 1]; data-quality issues in specific items [DATASET-D49, D43–D48]; annotator demographic opacity limits convergent-validity assessment.

ID	Evidence
CRITICAL Concern 1	Every example in the sample is structured as a 4-option MCQ with a single correct label ('target'). There are no rationale fields, explanation columns, or any annotation supporting the deployment's core output requirement: a substantive Hindi-language explanation of why an answer is correct or incorrect.

Information Gaps

- Annotator demographics, IAA, and formal QA protocol not documented
- Frequency of data-quality issues like 'none of these' answers and truncated items in the full test split

Requires Expert Verification

- Whether MCQ keys for North-India-relevant Polity/History items align with how Hindi-medium central-exam coaching answers them
 - Establishment of a regional Hindi-medium expert panel to spot-check labels and produce rationale ground truth
-

Remediation

Gap 1: Annotator demographics not reported [Q87]; some items appear truncated or have suspicious answers [DATASET-D43–D49]

Recommendation: Recruit a small Hindi-medium central-exam expert panel to audit a stratified 200-item sample for label correctness, register, and structural completeness; remove confirmed broken items from the deployment-evaluation subset.
